

	Alpha Aerosols	SOP #: AER-PL-001 DATE: June 2026 REVISION: 01
	Standard Operating Procedure (SOP) Planning and Procurement Department	

Title: Order Receipt and Review

Effective Date: June 2026

Purpose: To ensure every Sales Order is verified and entered into the schedule before planning begins.

Scope: All Sales Orders received for the Aerosol Plant.

Responsibility: Planning and Procurement Lead; Sales and Commercial Team

Procedure:

1. Receive the Sales Order

- Collect the Sales Order by email, ERP system, or physical document.
- Check that product code, quantity, required delivery date, and specs are present.

2. Check Finished Goods Inventory

- Review current finished goods stock in the ERP system.
- Available stock may partially or fully cover the order, reducing production needed.

3. Check Production Feasibility

- Confirm the plant can produce the required quantity by the requested delivery date.
- Confirm raw materials are either in stock or can be procured in time.

4. Confirm or Adjust the Delivery Date

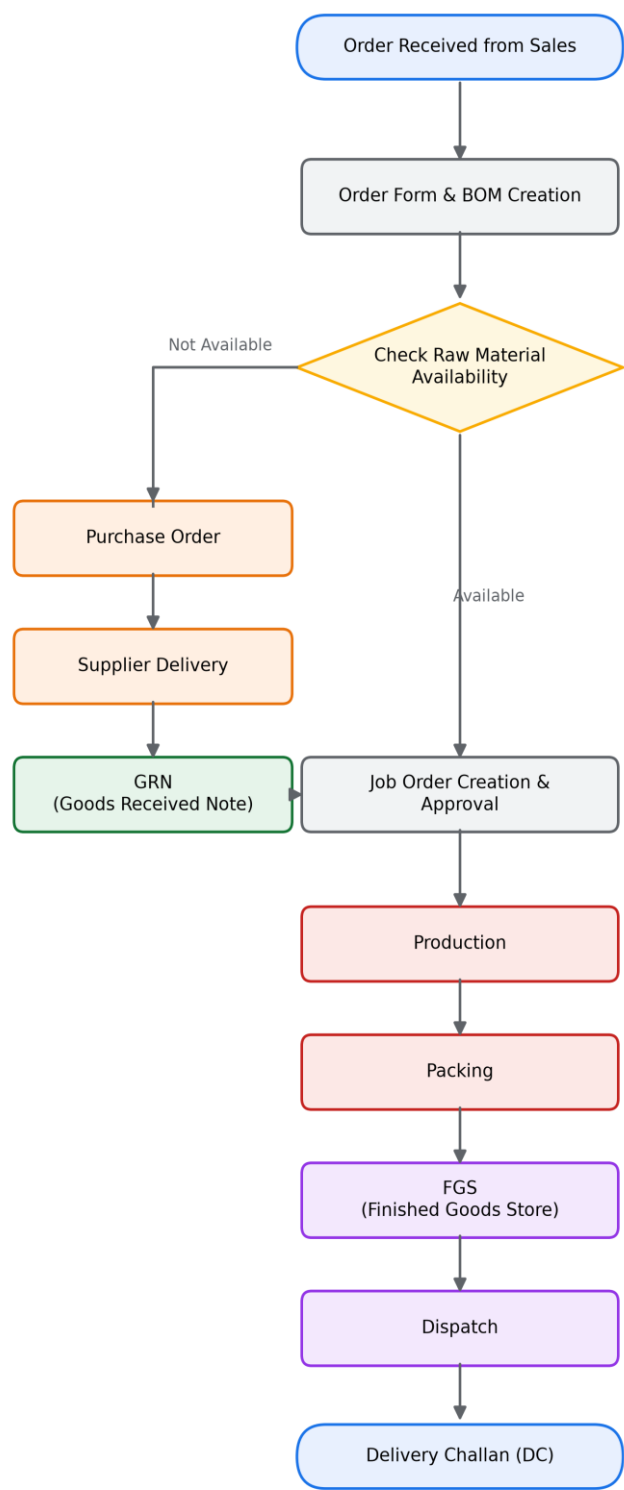

- If feasible: add to the Master Production Schedule and confirm the date to sales.
- If not feasible: propose a revised date to the Production Manager with a reason.

5. Update the Sales Order Log

- Record the order with status: Received, Planned, In Production, or Dispatched.
- Update the status each time the order moves to the next stage.
