

# Alpha Aerosols

## Standard Operating Procedure (SOP) Planning and Procurement Department

SOP #: AER-PL-005  
DATE: June 2026  
REVISION: 00

**Title: Material Prioritization**

**Effective Date: June 2026**

**Purpose: To ensure the most critical materials are always acted on first when multiple orders are active.**

**Scope: All material procurement requisitions raised for the Aerosol Plant.**

**Responsibility: Planning and Procurement Lead**

### Procedure:

#### 1. P1 — Critical: Act Immediately

- Stock is at zero or below the minimum safety stock level.
- Production will stop within 24 hours if this material is not received.
- Notify Supply Chain Manager immediately. Escalate to Production Manager in 4 hours.

#### 2. P2 — Urgent: Act Within 24 Hours

- Stock covers less than 3 days of production at the current run rate.
- Raise the same day. PO must be placed within 24 hours. Monitor delivery daily.

#### 3. P3 — Routine: Weekly Cycle

- Stock is adequate but replenishment is needed within the normal lead time.
- Include in the weekly requisition batch. No urgent action needed.

#### 4. P4 — Strategic: Discuss Before Acting

- An opportunity exists to buy ahead, in bulk, or at a lower price.
- Get approval from the Production Manager before committing to extra quantity.

#### 5. General Rules

- Always state the priority level on every requisition submitted to Supply Chain.
- Recheck P1 and P2 status daily until goods are received at the plant.
- If a material's situation changes between cycles, re-prioritize and resubmit.
